**DETAILED ACTION**

Receipt is acknowledged of the amendment and extension of time filed  
06/26/2007.

After review of applicant's arguments, the rejection under the judicially created  
doctrine of obvious-type double patenting is hereby withdrawn.

After a review of the file, the following are new rejections of the claims:

***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 8, 15, 16, 23, and 31 are rejected under 35 U.S.C. 112, first paragraph,  
as failing to comply with the written description requirement. The claim(s) contains  
subject matter which was not described in the specification in such a way as to  
reasonably convey to one skilled in the relevant art that the inventor(s), at the time the  
application was filed, had possession of the claimed invention.

Claims 8, 15, 23, and 31 are unclear when referring to the "chemical derivative  
thereof". The specification provides no guidance as to the derivatives contemplated.  
Clarification is requested.

Claim 16 is unclear when referring to delivery of the molecule of interest "through the application site". Clarification is requested since transdermal or transmucosal delivery does not appear to be described.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 9-15, 24-31 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claims 9 and 24, the phrase "such as" renders the claim indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d). It is further suggested applicant rewrite this claim as a proper Markush Group.

Claims 10-15, 25-31 should also depend upon claims 9 and 24 since applicant is setting out the broad group of bioactives to be included in the invention.

Claims 18-22 and 32 are objected to as dependent upon a rejected base claim.

Art Unit: 1615

***Allowable Subject Matter***

Claims 1, 3-7 allowed.

Correction of the above cited rejections will place the application in condition for allowance.
